Did you know?

The benefits provided under the plan can be claimed in the zone where the **main destination country** is located as well as **in the lower zones**. In other zones, cover is limited to **accidents and medical emergencies**.

For example:

If you have chosen the United States (zone 0) as the main destination country, you are covered all year round in zone 0 and in **all the lower-level zones** listed above for unforeseen and scheduled medical care.

When calculating the price, it's important to **specify the country or countries where you want to receive your care.**

If you have chosen Thailand (zone 2) as the main destination country and plan to receive medical care in Singapore (zone 1), you should select Singapore under Filters/Cover zone/Select a country/Singapore. Medical care will then be covered in zones 1 and 2.

You can select multiples countries. Cover will then be extended to the zone in which these countries are located. They will be listed on the insurance certificate.
